

Expiration Date Lookup for US-Labelled Supply

AstraZeneca COVID-19 Vaccine was authorized for use in accordance with the Interim Order Respecting the Importation, Sale and Advertising of Drugs for Use in Relation to COVID-19. As an extraordinary measure to provide earlier access to vaccine supplies in the context of the global pandemic, AstraZeneca is providing, at this time, vaccine vials and cartons labelled with **the US labels**. These labels are presented in English-only and are missing some important Canadian-specific information normally found on Health Canada approved labels (see Health Product Risk Communication dated March 31, 2021 available at www.AZCOVID-19.com).

The expiration date for the US-labelled batches/lots is not printed on the vial and carton labels. **Healthcare professionals must verify the expiration date prior to vaccination. If expiration date is not printed on the vaccine packaging or vial, please refer to the batch/lot number and corresponding expiry date below.**

Batch/Lot Number	Expiry Date
MT0055	01-Jul-2021
MT0056	01-Jul-2021
NA0079	30-Jun-2021
